Administrative Bulletin

SUBJECT: Policy Relating to Applications for Member Extension Loans

1. It is the policy of the Rural Electrification Administration to require that applications for loans to finance increased capacity of service drops and transformers for individual members and the construction of extensions of not more than 5,000 feet of single-phase line to lines of a borrower existing at the time the application is approved, be supported by a Board resolution stating the purpose of the application, the estimated number of persons to be served, and that no funds have been provided in prior loans for the same extensions. Borrowers will not be requested to submit either a map or a tabulation of persons with such applications unless very unusual circumstances indicate the need thereof.
2. The Applications and Loans Division is responsible for informing borrowers of this policy.
3. This Bulletin supersedes all other existing instructions in conflict with its provisions.
